PG&E, Dublin celebrate grand opening of new Center for Gas Safety & Innovation

Continued from page 1

"We're pleased PG&E selected Dublin as their headquarters for this important work. Dublin has become a hub for innovation, and today's grand opening reinforces our commitment to support businesses that not only enhance the community of Dublin but reach consumers throughout the state and country," said City of Dublin Vice Mayor Don Biddle.

The three groups housed in the center each have their own role and objective:

Methods and Procedures (M&P)

This group of engineers and specialists are responsible for creating and revising PG&E's gas guidance documents, tools and equipment to ensure that the operations of the gas system meet or exceed regulatory requirements. This team works with manufacturers to find and test new products and processes, including benchmarking with other gas companies.

Measurement and Control Test Lab (MCTL)

This group oversees the testing, evaluation and implementation of measurement and control device systems used on the PG&E gas pipeline system. Their findings provide guidance and support for gas control technicians and engineers working on the gas system. The team also provides technical support for project and operational needs.

Non-destructive examination (NDE)

This group evaluates the structural integrity of PG&E's pipeline facilities by conducting inspections, calibrations, testing and training. This helps ensure asset integrity on both gas distribution and transmission facilities throughout PG&E's gas service territory.

Construction of Kaiser Permanente in Dublin Continues

(Continued from page 1)

including a 24-hour urgent care clinic and a 40,000-square-foot radiation center.

"This is a tremendous asset, complementing the services we provide at our existing facilities in Livermore, Pleasanton and San Ramon," says Steve Zurnacian, MD, site lead for the Dublin Medical Offices and Cancer Center. "Dublin is one of the fastest growing cities in California and this medical office will really enhance the citizens of Dublin's health care experience." Some of the services that are planned for the new Dublin Medical Offices and Cancer Center include: 24-hour urgent care, ambulatory surgery; breast imaging; head and neck surgery; OB/GYN; oncology; orthopedics; physical therapy; podiatry; radiation treatment center; and urology. These are in addition to other planned features like health education, lab, pharmacy and x-ray.

Anticipation for the medical offices is running high in the Dublin community, says Roberta MacKenzie, associate medical group administrator for the Dublin Medical Offices and Cancer Center. "Many people have worked very hard to bring this about, and we are thrilled to have come so far on this journey," she says. "People are very excited that they are going to be able to get their care even closer to home."

Dr. Zurnacian agrees. "Kaiser Permanente members in the Tri-Valley will soon have a facility where they can access medical and surgical specialties, as well as 24-hour urgent care. It will be an amazing facility offering specialized care to our patients. It is exciting to see it all come together."

The Dublin Medical Offices and Cancer Center will be an addition to the existing Kaiser Permanente medical offices in Pleasanton, Livermore and San Ramon, allowing Tri-Valley residents to access the care they need, when and where it is most convenient to them—whether that is near home, work or school.

The Dublin Medical Offices and Cancer Center are expected to open in mid-2019. For the latest on Kaiser Permanente's Dublin Medical Offices and Cancer Center, visit kp.org/diablo.

OCTOBER, NOVEMBER & DECEMBER CALENDAR OF EVENTS
